## Material Options for Roller Guide on Series: 9000 & 30000

---

### Material: High density polyethylene (HDPE)

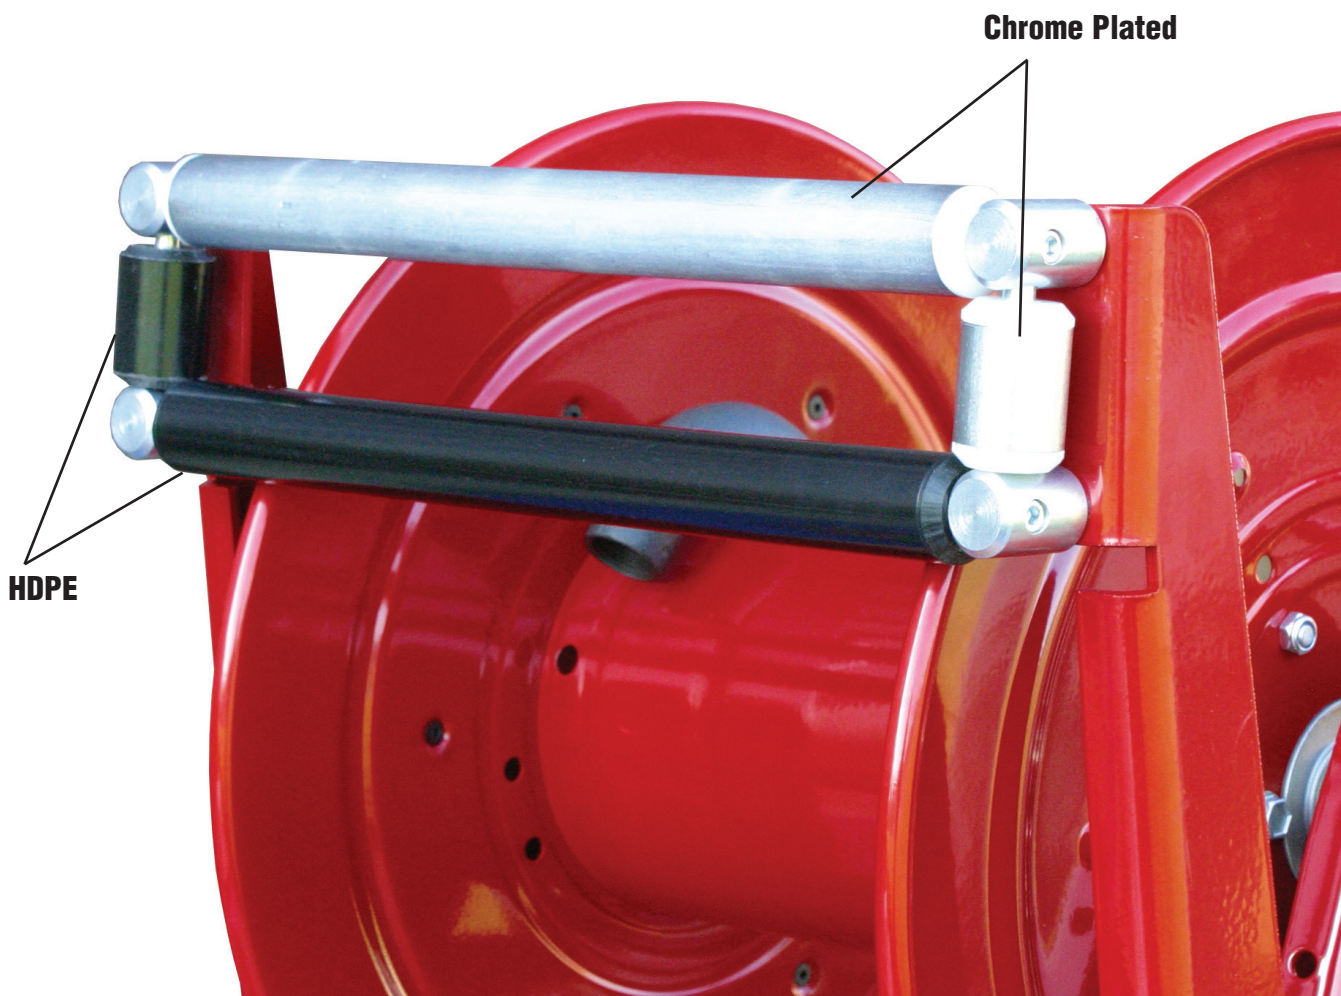

#### Characteristics:

- Doesn't absorb water and won't rust
- Will not crack in cold or melt in heat
- High impact strength will absorb impact energy without breaking or permanently deforming
- UV stable so exposure to sun light will not fade or crack material
- No plating to chip, peel or crack
- Non-marking
- Approved for food applications
- Good chemical resistance

### Material: Chrome-plated

#### Characteristics:

- Spools and blocks are chrome-plated to resist corrosion and abrasion.
