

Best of Irrigation **UNDERGROUND HOSE REELS**

5 Five Key **Benefits**

1. Respond Faster

React quickly and easily, reduce tangled hoses, power-rewind hose.

2. Reduce Turf Damage

Avoid landscaping and turf wear and damage from dragging hoses.

3. Save Labor, Save Money

Save labor by improving response time, reduce hose wear by storing on a reel.

4. Enhance Existing System

Provide quick supplemental irrigation to enhance your existing system.

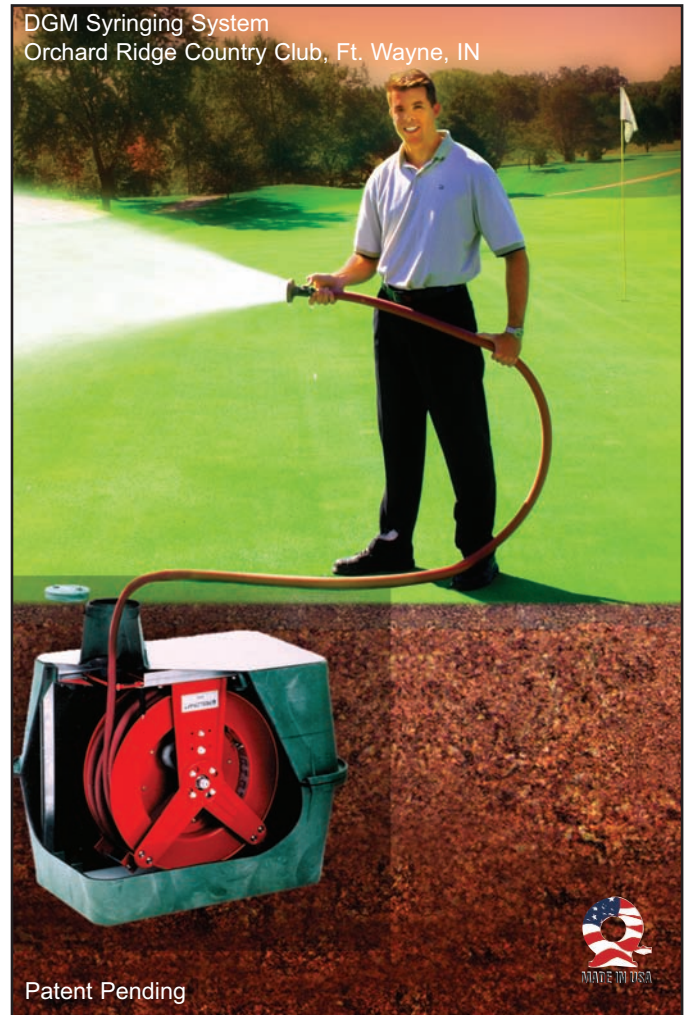

5. Save Equipment

Eliminate the need for a dedicated maintenance vehicle.

Reelcraft's exclusive patent pending underground watering system is specifically designed to make watering golf course greens, maintenance facilities and landscaping easier, more economical and efficient. The underground system features a 75-foot, 3/4" I.D. retractable water hose. This allows for quicker responses in urgent situations such as extreme heat stress or dry conditions, while preserving the quality of landscaping, maintenance facilities and golf courses by reducing wear and tear from dragging hoses. Simply pull on the hose to irrigate and give a tug when you are finished. Our underground watering system keeps hoses out of sight and offers less clutter and easy, safe convenience.

Underground_Hose_Reels_001_flr_P_4-0_050111

Reelcraft offers a complete line of hose and cord reels for turf care, golf course, clubhouse, landscaping and maintenance facilities.
