

AV4425 OLPBWL

Air Vend Hose Reel

New Product Announcement

DESCRIPTION

The AV4425 OLPBWL from Reelcraft is designed for air service. The reel is our most compact design able to handle 25' of 1/4". It is small enough to be incorporated into air service stations or inside cabinets on trucks and comes from the factory constant tension without a latch pawl. It utilizes a "jump guard" to eliminate the possibility of hose jumping off the spool due to extremely violent return or operator error. It comes with a tougher one wire braid hose to resist abrasion and crushing.

BENEFITS

- **Compact** Designed for tight spaces so that it may be mounted in cabinetry
- **Durable** Reel is made from heavy gauge industrial steel and hose is abrasion/crush resistant one wire braid.
- **Corrosion Resistant** Components are individually powder coated prior to assembly for a nearly impervious uniform finish.
- **Ease of Use** External guard eliminates the possibility of hose "jumping" off the spool during rewind.
- **Serviceable** External swivel design offers easy access to serviceable parts.
