

# Clean Air Hose Reel

Series 7000

New Product Option

## DESCRIPTION

Our 7000 Series is now available as a safe and efficient respiratory component. It features strength and reliability as with every other 7000 Series, and in addition the fluid path is non-corrosive stainless steel. When properly installed, Reelcraft's 7800 OLB21 clean air reel is designed to reduce the operator's burden of managing long lengths of hose. When the reel is not in use, expensive respiratory hoses are stored up and out of harms way. The reel holds 50' of 3/8" I.D. neoprene hose.

## BENEFITS

- **Safety** Reel stores hoses up and out of the way when not in use, reducing possibility of slips, trips, and falls.
- **Strength** Base and guide arm are made from heavy gauge steel and robotically welded for superior strength by design.
- **Versatility** Multi-positional guide arm facilitates ceiling, wall or floor mount and adjusts with the removal/repositioning of four bolts.

## RELATED PRODUCTS
