DESCRIPTION

Reelcraft's engineered products group has the capability to custom build to your specifications. The customer works directly with the engineer assigned to the project to design and develop the best possible solution to satisfy their needs. Our special engineered products are developed for demanding applications such as marine, military, aviation, hydroseeding, sewer and well cleaning, offshore oil rigs, robotic cable and much more. We offer flexibility, competitive pricing and over 20 years of experience in manufacturing custom built hose, cord and cable reels. Reelcraft's custom built products offer the complete solution to your reel needs.

Reelcraft's Capabilities

- **Unlimited Size & Weight** We can build to meet any extreme size and weight constraints.
- **Special Finishes/Paint Options** Including galvanized, CARC paint, marine grade epoxy, liquid enamel coat paint and powder coating in any color.
- **Various Drive Types** Including manual crank, motorized, spring driven, and hand over hand.
- **Limitless Pressure Ranges** A wide variety of pressure ranges available from 50 to 15,000 PSI and beyond.
- **Unique Accessory Options** Hose Boss rewind assist, tensioning bars, multiple fluid paths, level rewind and much, much more.
- **No Minimum Quantities** Order from 1 to as many as you need.

◀ Reel shipped complete with directional control valves & air pressure manifold, all specified by the customer & ready to go out of the box.

Systems are designed entirely in house and built to customer specification with the objective that all the customer needs to do is remove the packaging and turn it on.

Hydraulic power pack with 8 hp gasoline powered motor ▶

Special hose for well cleaning applications sourced and installed from factory ▼

Complete system designed to fit in a standard truck bed ▲

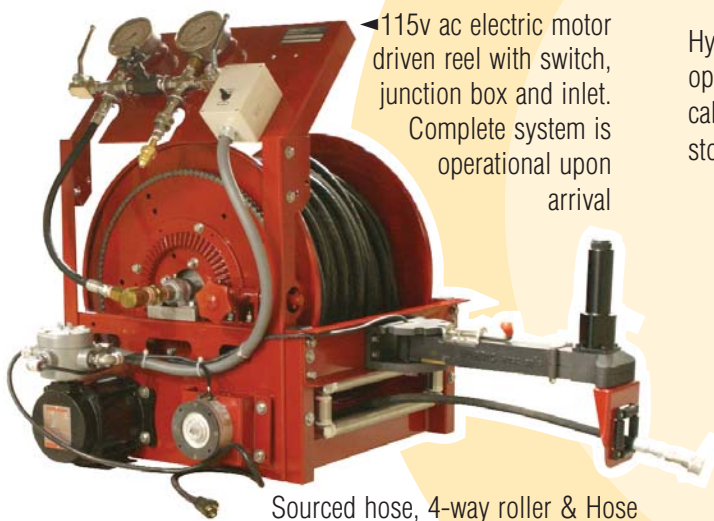

Applications & Markets

- | | | |
