# Tech Bulletin <br> Pressure Drop / Flow <br> Rate Charts and Graphs 

## Following you will find multiple graphs and charts that represent expected conditions based on a variety of end user specified inputs. These values are calculated estimates and your individual results may vary.

This table covers useful information as it particularly pertains to hose. Some of the data in these tables has been extracted from standard engineering texts; devised specifically by the Hose Technical Committee of the Industrial Products Division, are based on average conditions and are not to be used as a minimum-maximum but merely as a guide. Conversion to metric units have been rounded for convenience.

## Caution:

The reader is cautioned that the following tables are intended for general reference and general applicability only, and should not be relied upon as the sole or presice source of information available with respect to the subject covered. The reader should also refer to and follow manufacturers' specific instructions and recommendations with regard to such information, where they exist.

WATER DISCHARGE
FLOW OF WATER THROUGH 100 FOOT LENGTHS HOSE, STRAIGHT-SMOOTH BORE U.S. GALLONS PER MINUTE

| Psi at Hose Inlet | Nominal Hose Diameters - Inches |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1/2 | 5/8 | 3/4 | 1 | 11/4 | 11/2 | 2 | 21/2 | 3 | 4 | 6 | 8 |
| 20 | 4 | 8 | 12 | 26 | 47 | 76 | 161 | 290 | 468 | 997 | 2895 | 6169 |
| 30 | 5 | 9 | 15 | 32 | 58 | 94 | 200 | 360 | 582 | 1240 | 3603 | 7679 |
| 40 | 6 | 11 | 18 | 38 | 68 | 110 | 234 | 421 | 680 | 1449 | 4209 | 8970 |
| 50 | 7 | 12 | 20 | 43 | 77 | 124 | 264 | 475 | 767 | 1635 | 4748 | 10118 |
| 60 | 8 | 14 | 22 | 47 | 85 | 137 | 291 | 524 | 846 | 1804 | 5239 | 11165 |
| 75 | 9 | 15 | 25 | 53 | 95 | 154 | 329 | 591 | 955 | 2035 | 5910 | 12595 |
| 100 | 10 | 18 | 29 | 62 | 112 | 180 | 384 | 690 | 1115 | 2377 | 6904 | 14712 |
| 125 | 11 | 20 | 33 | 70 | 126 | 203 | 433 | 779 | 1258 | 2681 | 7788 | 16595 |
| 150 | 12 | 22 | 36 | 77 | 139 | 224 | 478 | 859 | 1388 | 2958 | 8593 | 18313 |
| 200 | 15 | 26 | 42 | 90 | 162 | 262 | 558 | 1004 | 1621 | 3455 | 10038 | 21390 |

Figures are used as a guide since the hose inside diameter tolerance, the type of fittings used, and orifice restriction all influence the actual discharge. Thus, variations plus or minus from the table may be obtained in actual service.
Q = 0.443Cd $2.63 \frac{\left(P_{1}-P_{2}\right)}{L} .54$

Where: $\quad$| Q=quantity in U.S. gallons per minute |
| :--- |
| $C=140$ for clean, extremely smooth bore and straight hose |
| $d=$ inside diameter of hose in inches |

$P_{1}-P_{2}=$ pressure change in lbs. per square inch
L=length of hose in feet

C value is the Hazen-Williams coefficient; smaller values must be used for rougher tube surfaces.

## CONVERSION FACTOR fLOW OF WATER THROUGH LENGTHS OTHER THAN 100 FEET STRAIGHT-SMOOTH BORE

*Charts are provided by Rubber Manufacturers Association

FRICTION LOSS IN WATER HOSE POUNDS PER SQUARE INCH PER 100 FOOT LENGTH STRAIGHT-SMOOTH BORE

| Flow of Water in | ACTUAL INTERNAL DIAMETER - INCHES |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| $80-90$ | $3 / 4$ | 1 |
| $90-100$ | $3 / 4$ | 1 |

## Determining Air Volume (CFM) Requirements

EQUIPMENT AIR REQUIREMENT AVERAGES
Always use free air (CFM) and pressure (PSI) specifications from nameplate on the device, or from the manufacturer, CFM free air figures below are averages and should not be considered accurate for any specific brand. If manufacturers' data are not available, the tables below may be used as an approximate guide.

| Miscellaneous Portable Tools at 70 to 90 PSI Range | CFM Consumption at $25 \%$ Use Factor | Miscellaneous Portable Tools at 70 to 90 PSI Range | CFM Consumption at $25 \%$ Use Factor | Miscellaneous Portable Tools at 70 to 90 PSI Range | $\begin{aligned} & \text { CFM } \\ & \text { Consumption } \\ & \text { at } 25 \% \text { Use } \\ & \text { Factor } \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Drill 1/16" to 3/8" | 6.25 | Horizontal Grinder, 4" | 15.0 | Air Motor, 1 HP | 6.3 |

## To select the proper size for a particular reel, it is essential to know the following:

1. Cubic feet per min. "free air" requirements of the equipment to be used.
2. The minimum pressure at which the equipment will operate efficiently. (If this is not available, it is recommended that the pressure drop not exceed 10 p.s.i. at 90 p.s.i. inlet pressure.)
3. Pressure loss, p.s.i. per 50 ft of hose, coupled each end.

Note: 1. Pressure loss is directly proportional to the length. For example, if the pressure loss is given for 50 feet of hose, the loss for 100 feet will be twice as much, and the loss for 25 feet will be half as much.

Note: 2. Above curve is based on inlet pressure - 90 p.s.i. (Standard pressure for shop purposes.)

PROBLEM 1: Find the size hose required to operate a paint spray gun (production type) that requires 8 C.F.M. of "free air" at 80 to 100 p.s.i. pressure.

Using the above curve-based on 90 p.s.i. inlet pressure and a recommended maximum pressure drop of 10 p.s.i. follow the 10 p.s.i. vertical line upward until it intersects with the horizontal line representing the 8 C.F.M. air flow.

Note that this point is above the $1 / 4$ " I.D. hose range and that if continued further to the right, intersects the $1 / 4$ I.D. hose curve at 15 p.s.i. pressure loss. The $1 / 4$ " I.D. hose cannot be recommended. Next larger size hose $3 / 8^{\prime \prime}$ must be recommended.

PROBLEM 2: Find the maximum cubic feet of "free air" flow through a $1 / 2^{\prime \prime}$ I.D. hose with a 10 p.s.i. pressure loss at 90 p.s.i. inlet pressure. Follow the 10 p.s.i. vertical line upward until it intersects with the $1 / 2^{\prime \prime}$ I.D. curve, follow horizontal line left for cubic feet per minute air flow. Approximately 50 C.F.M. is indicated for $1 / 2$ " I.D. hose.
