

Reelcraft: Better by Design

Reelcraft's reels are better by design because of our lasting commitment to excellence. Our engineering team is well known for designing durable, high quality products. Our standard

features include durable, corrosion-resistant powder coat paint, multi-position guide arms for versatile mounting options, and heavy-duty, reinforced steel stampings for

increased strength. Our reels are permanently factory-lubricated for a long, trouble-free service life. All of these features, and many more, add up to make "The Reelcraft Difference."

Reinforced Steel

The steel-stamped guide arm is reinforced to reduce bending due to angular pull.

Improved Connection

The elongated brass connector and proprietary adhesion process provide a better crimp to the hose.

Stress-Free Swivel

Our full-flow design combines the highest grade seal design with supporting bearing surfaces to ensure the longest possible life.

Corrosion-Resistant

Steel components are individually powder coated to virtually eliminate corrosion.

Long Service Life

Field-proven swivel assures long service life.

Kinkless Hose

High quality PVC hose is specially blended for use on reels

Sealed Connection Points

Swivel and hose inlet connections seal against leaks

Adjustable Guide Arm

Multiple guide arm positions provide versatile uses and easier field adjustment

Trouble-Free Performance

Fewer components increase the service life of the reel and improve performance

Long Life Drive Spring

Drive mechanism is enclosed for protection against the environment. Declutching arbor virtually eliminates possibility of spring damage due to reverse winding of reel spool.

Robust Latch

Wide profile combined with special spring assures maximum service life.

Structural Strength

Welded heavy gauge steel frame includes a robotically welded base with stiffening ribs for lighter weight, yet stronger components for ease of handling and installation.

Easy to Mount

Attaches to most structurally sound surfaces. Edges are curved for safety.

Finish with Quality

Our components undergo a special five-stage cleaning process and are individually powder-coated for the highest quality paint adhesion. Excess powder is reclaimed to be environmentally friendly.

To place an order, please advise:

1. Model number
2. Account number
3. Shipping method

Not a Reelcraft distributor? Visit our online interactive catalog to find an online or local distributor.

Additional Considerations:

A flexible connection between the reel and the source of supply is required to prevent possible misalignment and binding. Non-flexible connections will void the warranty. The pressure rating of inlet hose must be equal or greater than the rating of the reel.

***Consult Reelcraft for recommendations if installation height is more than 16 feet.**

Accessories

Reels ordered with hose and bumper are assembled complete and ready to install. Order bumpers separately for reels without hoses.

Additional questions? Please visit our website or call for assistance. For more than 50 years, our specialty is offering hose handling solutions.
